The leading finance society in Austria

Society Overview

01. Pushing club culture

Creating a space for **like-minded companionship**, cultivating an environment where we **push** each other towards becoming a better version of our yesterday's selves

02. Alumni network

Providing a **networking platform** and access to a strongly connected international alumni network

03. Partnerships

Enabling members to participate in **company events** & case studies, and providing **internship opportunities** via our broad range of corporate partners

“Rendering Vienna an attractive city for recruitment in finance by closing the gap between academic theory and practice – thus attracting leading investment firms to explore the capabilities of our members”

Our Divisions

Global Markets, Algorithmic Trading and Equity Research serve as our core educational pillars

Global Markets

- Develop an analytical framework to identify **trading opportunities** from economic and political events
- Capitalize on **market trends** and translate macroeconomic research into structured trades across major asset classes
- Presenting research and trade ideas to industry professionals

Algorithmic Trading

- Approach financial Markets in a **rule-based, quantitative** environment
- Using of statistics and machine learning concepts
- Assemble own **algorithms** and deploy them
- Implementation and back-testing using R and Python

Equity Research

- Qualitative and quantitative analysis of **individual equities** based on industry and company fundamentals
- **Financial modelling** and analysis through DCF, CTA, CCA...
- Publication and presentation of equity research reports
- Pitching of analysis in front of an investment committee

Our Management

Our management team constantly strives to push things forward and to ensure a smooth sailing of our society
