Agenda

Share Price Performance

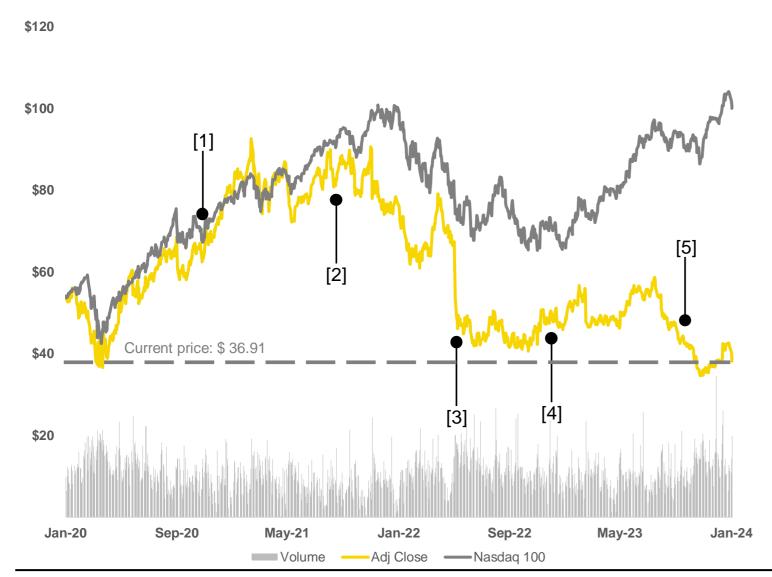

S

Cognex recently suffered from declining revenue, leading to a deviation from the NASDAQ that is poised to revert

Major Events

- [1] 28.10.2020 (+16.0%) Cognex publishes earnings forecast with increased expected sales in consumer electronics and e-commerce sectors
- [2] 05.08.2021 (-5.4%) Q2 2021 earnings call with highest quarterly revenue in Cognex's 40-year history, but difficult supply chain environment
- [3] 05.05.2022 (-31.0%) Earnings call with disappointing results for Q1 2022
- [4] 08.12.2022 (+1.3%) Cognex acquires SAC Sirius Advanced Cybernetics GmbH, a German leader in lighting technology
- [5] 25.08 29.08.2023 (+2.5%) Cognex signs the acquisition of Moritex, a global leader in machine vision components, headquartered in Japan

Key Stats

■ **IPO**: 1989

Ticker: CGNX (NASDAQ)

Close (Jan 31): 36.91

52-week rage: USD 34.28 – 59.51

Market capitalization: USD 6.37B

Investment Thesis

W

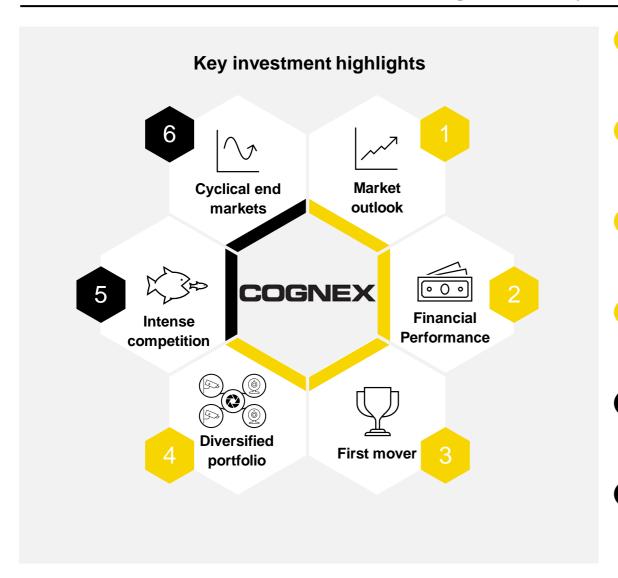

S

Advanced machine vision solutions enable Cognex to catalyse on global automation growth

Cognex is **poised to capitalize** on the imminent **turnaround** in their **key end markets**

Track record of **strong top-line growth**, consistently **high margins** and a **debt-free balance sheet** define the financial performance

Cognex is an **early adopter** of new technologies, serving as one of the **main innovators** in the machine vision market

Highly diversified and superior **product portfolio** thanks to wide array of products within each segment

The machine vision market is **highly competitive** and Cognex must assert its presence against **large**, **established firms**

Relatively **cyclical end markets** introduce **vulnerability** to **economic downturns**, potentially impacting the demand for Cognex's products

Company Overview I

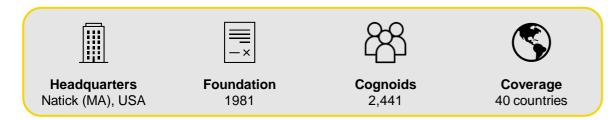

S

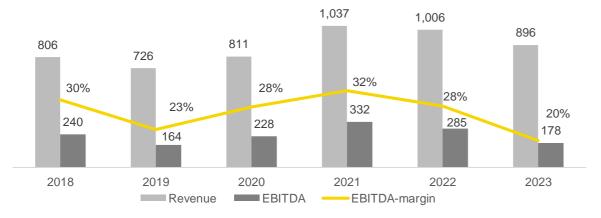

A global leader with a highly experienced management team and long-standing track record

Overview

Cognex¹ is a **global leader** specializing in **machine vision systems**, **software**, and **sensors** used in **automated manufacturing** and **logistics** processes. Founded in 1981, Cognex offers **innovative solutions** to **various industries** such as **automotive**, **electronics**, and **consumer products**

Financials (in \$mn)

the sector

Shareholder Structure

92% held by institutional investors, mainly traditional investment firms

Geographies

Cognex runs its business mainly in the US and EU with local sales offices all around the world

World Map Patents per Region 695 **Europe** Reginal HQ: Karlsruhe **Greater China America** • Offices: 22 Reginal HQ: Shanghai HQ: Natick, MA • Employees: 600 Offices: 12 311 • Offices: 14 290 290 ■ Employees: 350 ■ Employees: 1300 America Other Asia Europe Greater China Assets (in \$mn) Other Asia Europe Indonesia Reginal HQ: Shanghai **Greater China** • Offices: 14 Majority of products ■ Employees: 150 **America** supplied by one player Other Asia 60 **Geographical Focus** Revenue China RD&E mainly conducted at their **Europe America** Other headquarters in the US 20% 26% 40% 14% Facilities outside the US largely serve as sales offices

Company Overview II

Cognex offers a set of comprehensive and patented solutions across diverse end markets

End Markets

Automotive

Machine vision solutions that enhance manufacturing, ensuring high-quality and efficient production in areas such as assembly and inspection

25% of sales

Logistics

Systems optimizing distribution operations, enabling accurate tracking, sorting, and efficient management of goods

20% of sales

Consumer Electronics

Technology that ensures the precision and quality control of electronic components, contributing to the production of reliable and high-performance devices

Medical Related

Advanced imaging and inspection capabilities, supporting the production of medical devices, ensuring compliance with stringent quality standards

10% of sales

Other

Machine vision applications for manufacturers of semiconductors, food producers or manufacturers using **3D measurement**

25% of sales

Product Segments

Vision Systems / Senors

- Cognex vision systems provide exceptional accuracy for parts inspection, identification and quidance
- The industrial-grade vision systems integrate a range of advanced vision tools with fast image capturing and processing capabilities

Barcode Readers

20% of sales

Vision Software / Tools

- Cognex offers a comprehensive range of industrial barcode readers known for their durability, reliability, and unmatched read rates in the industry
- With advanced technology, modular options, rugged design and intuitive setup, Cognex stands out as the preferred brand
- Cognex's machine vision software offers the forefront of vision technology, available in multiple formats tailored to meet diverse development requirements
- The patented algorithms produce solutions for diverse applications in virtually all manufacturing and logistics industry sectors

Cognex holds a total of 1,712 patents worldwide, showcasing its commitment to innovation and technological advancement

Product Deep Dive I - Hardware

Cognex's products operate at the heart of virtually all manufacturing and logistics processes

Vision Systems

Barcode Reader: DataMan 380

 Image-based barcode reader providing insightful, actionable data by capturing and tracking product and package information in high-speed operations

 Powerful, Al-assisted decoding accelerating throughput during multisymbology reading

Vision System: In-Sight D900

- Solves a range of tasks from defect detection to assembly verification and optical character recognition
- Processing takes place on-device, eliminating the need for a PC
- Embedded with powerful edge learning tools that leverage Al technology to learn "on the edge"

Vision System: In-Sight 3D-L4000

- 3D vision technology combining laser displacement technology with smart camera allowing to quickly, accurately, and cost **effectively** solve a wide variety of operations
- Patented speckle-free blue laser optics

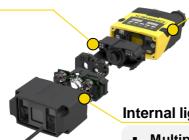

Software: VisionPro

- Industry-leading PC-based vision software, designed to setup and deploy vision applications
- Wide range of functions, from geometric object location and inspection to identification, measurement, and alignment

Optical Components

Lens

- Entered high-end optical components market through Moritex acquisition
- Ultra-high resolution, high-speed lens allowing fast image setup and optical character

Base

Multiple power options and communication protocols enable fast and easy data transfers

Internal lightning

 Multiple options: red (standard), white, blue, infrared and ultraviolet lighting

USPs

State-of-the-art technology, pushing the boundaries of precision, innovation, and automation delivering outstanding ease of integration, and favorable total cost of ownership

Al and **Machine** Learning

Flexibility and Adaptability

Cloud connected

Ease of Integration

Product Deep Dive II - Software

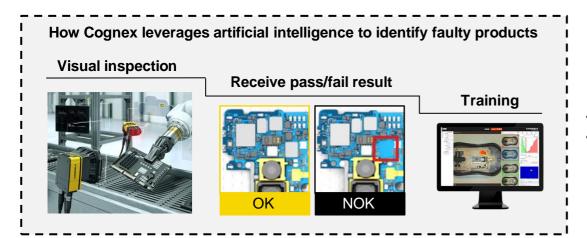

S

Cognex is an early adopter of new technologies and fosters continuous innovation

Vision Systems

In-Sight SnApp

Web-based operation system

No training of codes

Main Advantages

Flexible functions

Solving a variety of problems such as anomaly detection and 2-class authentication, with only one device

Superior detection function

Inspection of multiple objects in a larger target area enabled by artificial intelligence

Usability

Web-based interface enables quick set-up without prior training and software knowledge

Product Features

Existing

Identify defects

Inspect labels

2-class classification

Inspect for Detect missing debris parts

Under development

Optical character recognition

Assembly verification

4-class classification

Counting

Identification

Customers

Cognex's customer-centric approach elevates customer success and empowers industries worldwide

Customers

Cognex boasts a highly diversified, renowned, and enduring customer base, reflecting its ability to establish long-lasting relationships across diverse industries

Customer Case Study

Schneider #Electric

Schneider Electric (Chasseneuil, France)

Industry: Electronics

Objectives

Eliminate inconsistent quality associated with manual inspection

Key Results

Higher overall product quality using Al-based inspection technology

Increase efficiency of manufacturing processes using inspection data to optimize production parameters

Reduced waste by adjusting machine parameters and increased speed of delivery

Cognex Solution: In-Sight 2800, D900 & 3D-L4000, Vision Pro Deep Learning, Cameras, and DataMan 8700 Series

Josef Manner Group (Perg, Austria)

Industry: Food & Beverage

Objectives

Products in correct and air-tight packaging

Key Results

Detected packaging characteristics quicker, more flexible and efficient; identifes defects faster

Detailed inspection before the chocolate leaves the factory for distribution

Increase in productivity of 5%

Cognex Solution: In-Sight machine vision system

Strategy

S

Extensive RD&E efforts coupled with strategic acquisitions underscore Cognex's dedication to innovation and growth

Research, Development & Engineering

Technology leader in the machine vision industry

Early adopter of new market generation with AI and machine learning

Consistently attributing ~15% of their Revenue to R&D spending

Focus on application software development

Deep Learning Software

- Collaboration with Dell Technologies
- Development of Cognex's Vision Pro/Designer software
- Edge compute-based software for factory automation
- Used for neural network training and operation

32456

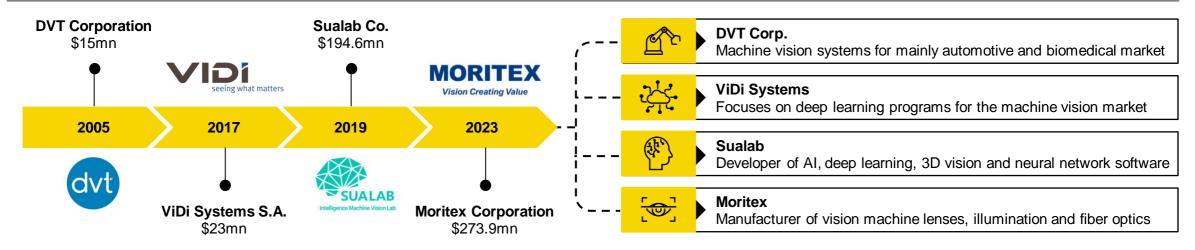

DIGIMARC

Digital Watermark Labels

- Case study with Digimarc Corporation and P&G
- Quality control application for special food grade labels
- Application that uses P&G's internal product identifiers
- Automation enables increased efficiency and cost savings

Market Overview – End Markets I

Cognex's primary markets are on the brink of a robust resurgence, driven by powerful catalysts

Use Cases and Outlook

Automotive

Gauging parts

pre-assembly

Guiding robot assembly

Inspecting electrode specifications

damage

Logistics

Object and symbol recognition

Dimensioning

Gauging parts pre-assembly

Guiding robot assembly

Inspecting electrode specifications

Short-term headwinds

Western EV Manufacturers like Ford are experiencing softer demand than expected and are delaying plant construction

Post-pandemic pause

The past 6 quarters have been a far cry from the pandemic era boom experienced in the industry as players absorb excess capacity

Sales slump following COVID

Manufacturers make use of dampened consumer demand for smartphones and data centers in 2023 to clear inventory

Growth story remains intact

Despite the plateau in sales, growth expectations remain in the 20-30% range for the next 2 years; Asia offers particularly strong growth

Destocking to restocking

Now that E-comm players have offloaded excess supply, importers and logistics providers should start to see growth picking up again

Electronics market hits bottom

Industry bellwether TSMC suggests destocking is over and demand is on the rise. Additionally, global shipments in 4Q'23 grew 8.5% YoY

2025 Inflection

Lower prices and enhanced technology are expected to kick in until 2025, further boosting growth prospects

New avenues for growth

Highest growth rates expected in Europe and Asia, where players are beginning to catch up with the U.S. in logistics automation technology

Chip demand for Al applications

Increased miniaturization & complexity in CoWoS¹ packaging as well as rapid growth rate necessitates Machine Vision for success

Market Overview - End Markets II

Expanding addressable markets substantiated by tangible trends and concrete data

Prevailing Trends

Automotive

Transition to EVs driving automated production & increased QC

Shorter design cycles increase demand for rapid adaption

Proliferation of electronics in automobiles as a driver

Increasing automation at logistics providers and retailers

Logistics

Rapid E-Commerce growth especially in APAC

Retailers to invest heavily in online fulfillment

Consumer Electronics

Increased miniaturization and complexity of new devices

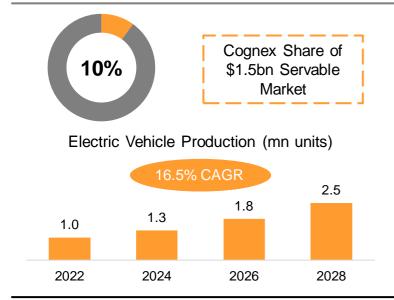

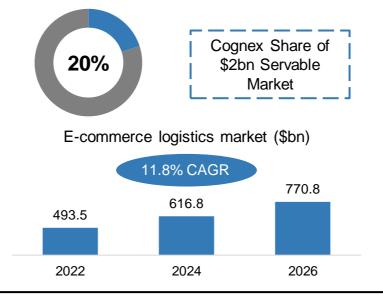

5G, IoT, AR/VR as growth drivers for industry

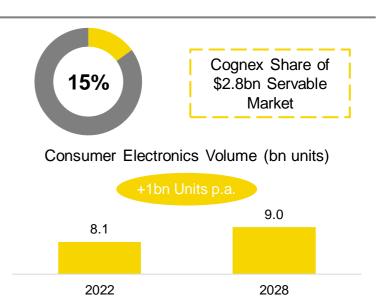

Short product lifecycles resulting from high innovation

Market Size and Growth

Market Trends and Drivers

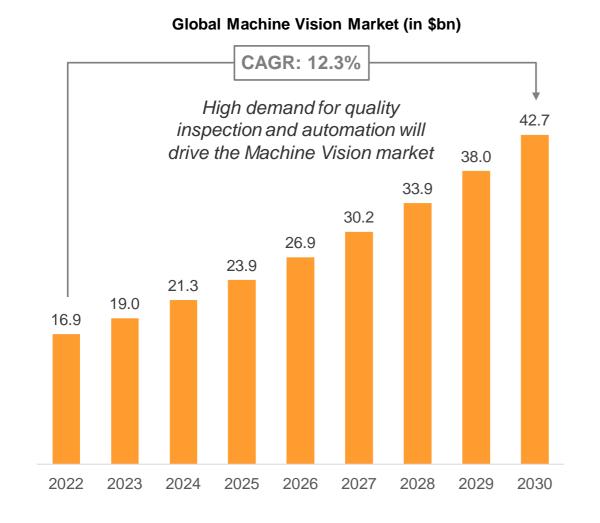

I

S

Fast-paced innovation and structural changes result in growing MV market and uptick in demand for Cognex's products

MV Market Size

Market Growth Drivers & Trends

Increasing automation in manufacturing:

Global industrial automation trends increase demand for Cognex's MV technologies, essential for improving efficiency & quality control

Global supply chain optimization:

Companies looking to optimize global supply chains are investing in automation and tracking technologies

Expansion in robotics applications:

Robotics application in industries like manufacturing and healthcare offer opportunities for Cognex's technology in guidance & inspection

Rise of smart factories and industry 4.0:

The shift towards smart factories and the adoption of Industry 4.0 principles underpin the need for Cognex's systems

Automotive industry advancements:

Advancements in the automotive industry, especially in electric vehicles, require high precision parts and assembly

Increased focus on quality and compliance:

Stricter quality control standards and regulatory compliance across industries necessitate the use of precise inspection systems

Cognex & the Machine Vision Market

S

The MV market faces certain threats that are clearly overshadowed by the plentiful opportunities for Cognex

Threats Opportunities

The imposition of **protectionist trade policies** by major economies like **China** could **restrict market access** or increase tariffs on Cognex's products

Ongoing advancements in AI and machine learning enable Cognex to develop more sophisticated and efficient vision systems

Cognex relies heavily on singlesource or few-source suppliers for essential components, presenting the risk of production hold-ups or other issues

Government policies favoring the procurement of green technology boost the market for Cognex's products if they are recognized as environmentally friendly

A downturn in key end markets like the automotive industry could lead to reduced demand for Cognex's machine vision products

The rise of **3D printing technology** could change
manufacturing processes,
creating a need for advanced
vision systems to inspect
complex geometries, providing a **new market** for Cognex

New regulations could restrict the use of machine vision in certain applications or increase the cost of compliance Increasing adoption of automation across various industries offers a growing market for Cognex

Peer Group Analysis

S

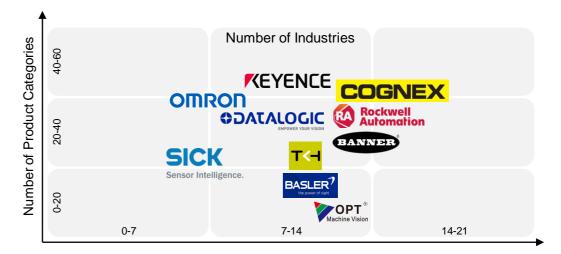

Cognex operates at the forefront of the highly competitive MV market

Peer Group Overview

- These companies concentrate significantly on segmenting the MVmarket
- Intense competition
- The market is controlled by established and recognized players

Competitive Landscape

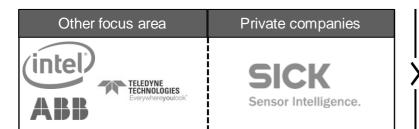

BASLER OPT ® Machine Vision

 Are less diversified than best peers regarding product portfolio

Interpretation of Peer Comparison

The market around Cognex is **highly competitive**, with several companies offering a similar portfolio and supply analog industries

Other focus areas

Nevertheless, Cognex is clearly the **frontrunner** and **surpasses** its **competitors** in the number of product **categories** and **industries**

Another **competitive edge** of Cognex is the **first mover advantage** regarding **new innovative products,** distinguishing itself from the competition

Peer Benchmarking I

W

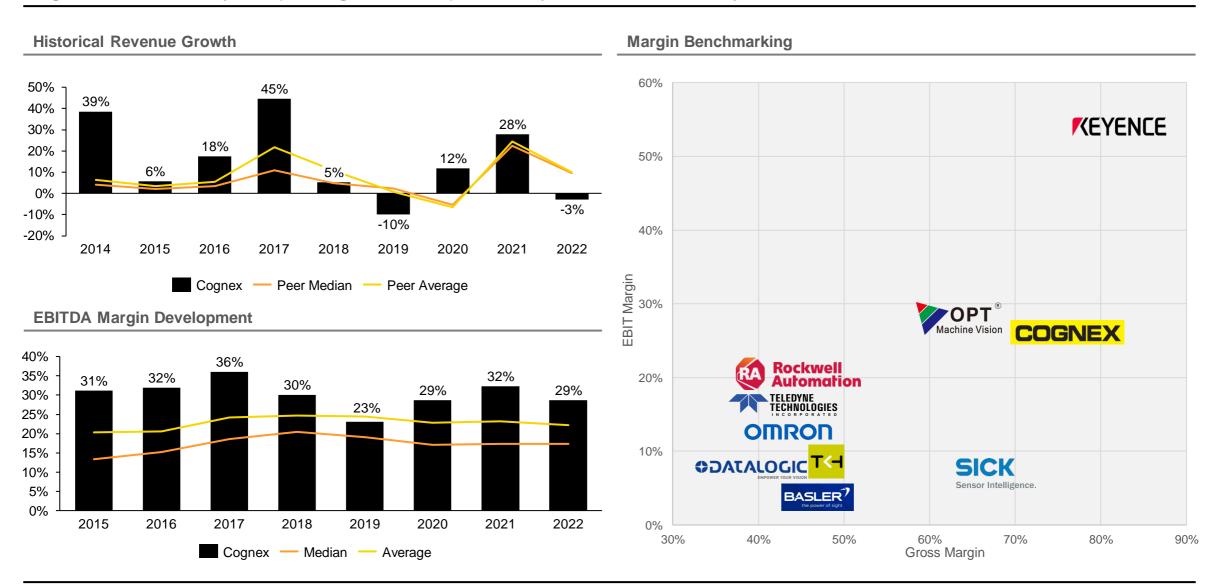

S

Cognex leads the way in top-line growth and profitability in a volatile industry

Peer Benchmarking II

W

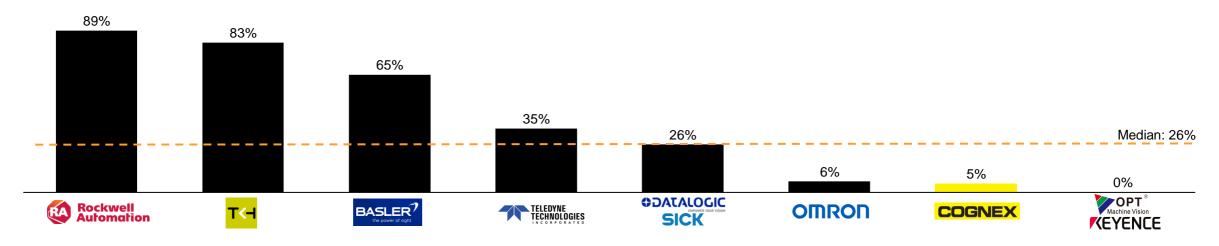

S

Cognex's financial strength and resulting agility result in better performance during industry downturns

Unlevered Free Cash Flow Margin Quick Ratio 29% 30% 7x 25% 23% 22% 21% 20% 20% 5x 4x 15% 4x 14% 15% 3x 2x 10% 5% 0% 2021 2018 2020 2016 2017 2018 2019 2020 2022 2017 2019 2021 2022 Cognex — Median Cognex Median Average Average

Financials & Valuation I

W

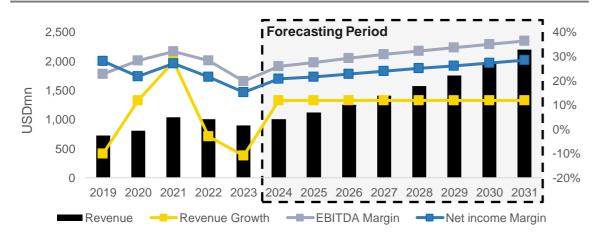

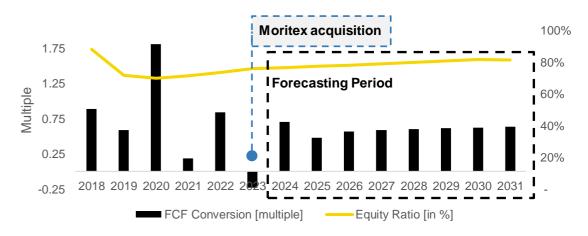

S

Cognex is poised to recover from recent industry downturn and return to historical average performance

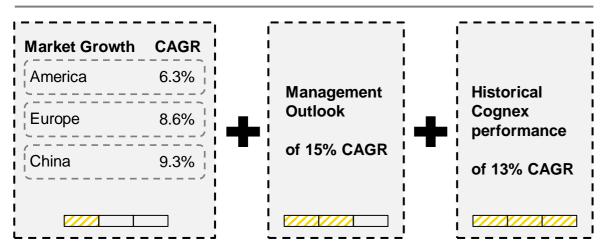

Revenue & Margin Development

Free Cash Flow Conversion and Equity Ratio

Revenue Forecast Rationale

Assumptions

Costs: Due to synergy effects in regards to the **Moritex** acquisition, costs for **COGS** and **SG&A** are expected to lower in the long-run

Exit: An **EV/EBITDA** exit multiple of **19.9x** has been chosen, which represents the **mean** of the main competitors of Cognex

WACC: Since the **captial structure** of Cognex is not expected to change any time soon, **only one WACC** was calculated for valuation

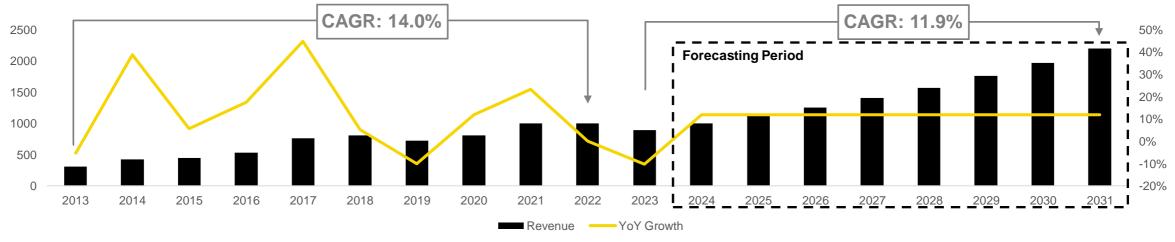

Financials & Valuation II

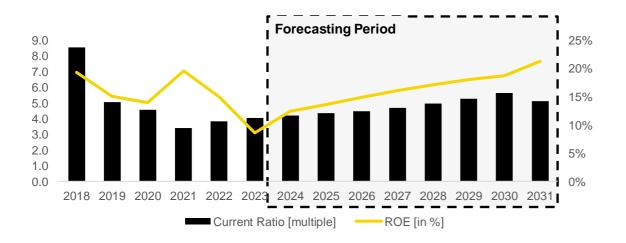

Projected revenue forecast exhibits a modest decrease compared to historical performance

Historical Revenue Growth Implies that Cognex Could Be Entering a Bull Market

Current Ratio and Return On Equity

WACC Sensitivity Table of the Share Price

Financials & Valuation III

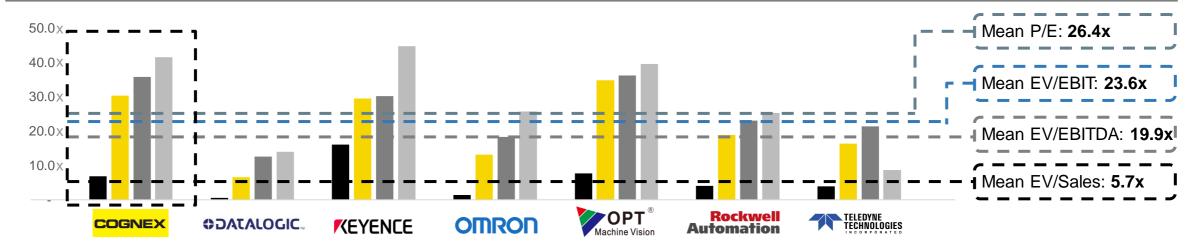

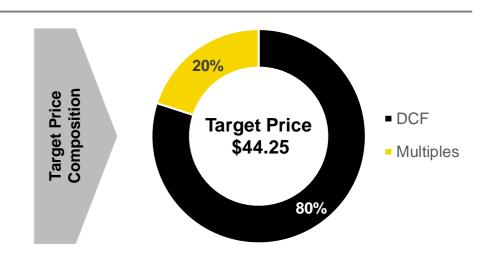

Valuation indicates a good entry point amid some future growth being already priced in

Multiples Valuation with Cognex's Main Competitors

Valuation Summary

Bull Case: Business cycles are starting to pick up pace, in combination with increased market share DCF Model Base Case: Combines the common consens of financial analysts as well as an outlook from the Cognex management Bear Case: Pressure on global supply chains as well as heated political situation in China puts strain on Cognex's growth rates

Conclusion

W

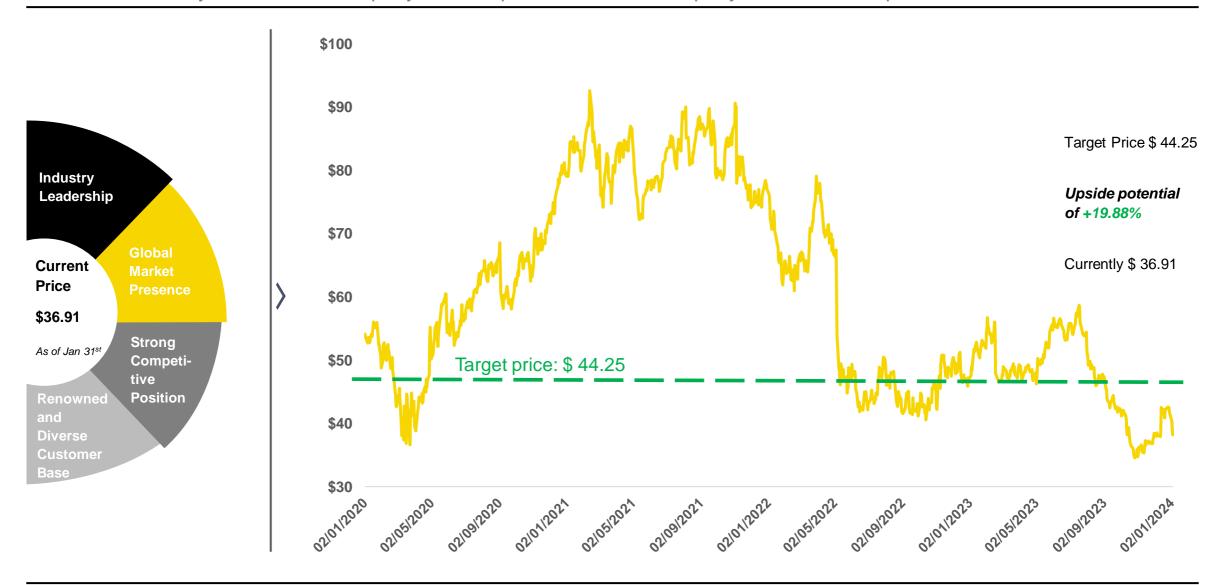

S

It's far better to buy a wonderful company at a fair price than a fair company at a wonderful price

Porter's 5 Forces

S

Mastering the market: Cognex's strategic edge in high-stakes industry rivalry

Threat of substitutes - MODERATE

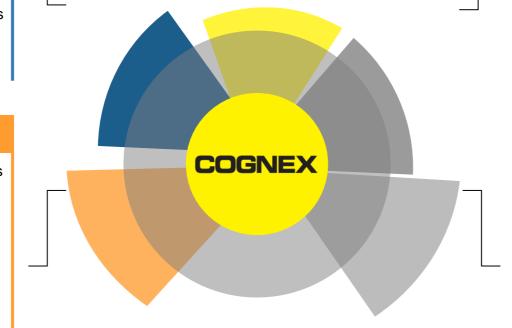

- (-) Availability of alternatives poses a substitution threat to Cognex
- (-) Substitutes with competitive pricing or superior features challenge Cognex
- (+) Cognex's product stickiness due to high switching costs reduces substitution threat
- (+) The distinctiveness of Cognex products is lowering substitution risks

Industry rivalry - HIGH

- (-) Cognex faces price and margin pressures from intense industry rivalry
- (-) Numerous providers of comparable products
- (-) Fierce competition for small market shares
- (+) Customer loyalty can lessen the intensity of rivalry for Cognex

Bargaining power of buyers - LOW

- (+) Buyers' switching costs limit their bargaining power
- (+) Cognex's diverse customer base reduces individual buyer power

Threat of new entrants - LOW

- (+) High capital and expertise create a protective barrier for Cognex
- (+) Established Cognex brand loyalty deters new entrants
- (+) Cognex's scale benefits can discourage start-ups
- (+) Industry regulations pose additional entry challenges
- (+) Cognex's patents secure its competitive edge

Bargaining power of suppliers - HIGH

- (-) Cognex may be susceptible to price hikes from niche suppliers
- (-) Supplier switching costs can lead to supplier leverage
- (-) Dominant suppliers influence terms
- (-) Unique supplier components give suppliers upper hand

SWOT Analysis

S

Strength and opportunities surpass weaknesses and threats

- Cognex is recognized for its advanced machine vision and industrial barcode reader technologies, which are critical for automation and quality control in manufacturing
- With operations in over 40 countries, Cognex has a broad market reach and a diverse customer base, enhancing its stability and market penetration
- The company **invests** significantly in **research and development**, ensuring continuous innovation and staying ahead in technology advancements

- Increasing adoption of automation across various industries offers a growing market for Cognex's products
- Ongoing advancements in Al and machine learning can enable Cognex to develop more sophisticated and efficient vision systems
- Emerging markets and new sectors like healthcare or logistics provide opportunities for business expansion
- Key end markets are expecting to have high growth rates in the future

COGNEX

- A large portion of Cognex's revenue comes from the automotive, logistics and electronics sector, making it susceptible to downturns in this industry
- The machine vision industry is highly competitive, with many established companies and new entrants. Cognex must continually innovate and distinguish its offerings to stay ahead
- International **trade conflicts** and tariffs can **impact supply chains** and market access, affecting Cognex's global operations
- Economic slowdowns, especially in key markets like automotive, logistics reduce demand for Cognex's products
- Changes in interest rates lead to an unstable financial and economic climate

Risk Matrix

In an industry where buyers highly prioritize efficiency and technology, there is **intense competition** among companies

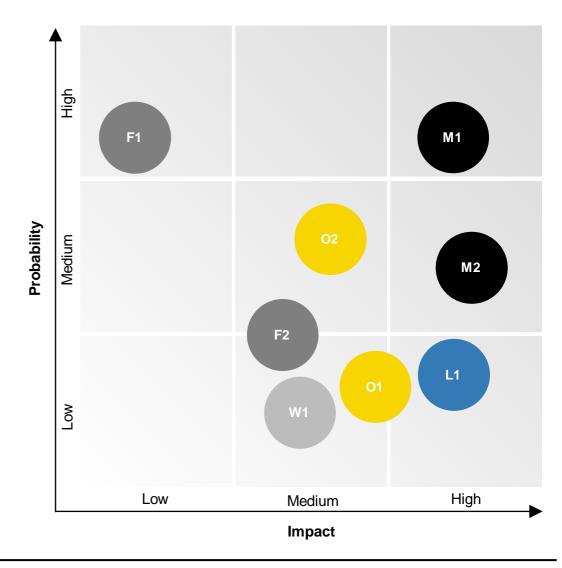

M2

The imposition of **protectionist trade policies** by major economies like **China** could **restrict market access** or increase tariffs on Cognex's international sales

- 01
- Approximately **65%** of the **revenue** comes from **automotive**, **logistics** and **consumer electronics**. Downturns in these industries cause risks for Cognex's business
- O2
- Sole-source or **limited-source suppliers** for critical components could pose risks of production delays if suppliers face **disruptions** or have other problems like warehouse fire, which Cognex's main supplier had
- F1
- There's a risk that customers or partners may **default** on their **payments** due to **rising interest rates**, which would negatively affect Cognex's cash flow
- F2
- The need to intensify ${\bf R\&D}$ to keep up with rapid technological evolution could lead to fluctuations in financial planning and budgeting
- W1
- Difficulty in attracting and **retaining talent** in specialized fields such as optics and robotics could impede innovation
- L1

A competitive advantage that is partially reliant on **patents**, which require protection and enforcement across different legal jurisdictions

Market (M) – Operations (O) – Financial (F) – Workforce (W) – Legislation (L)

Valuation and Financial Model VII

Rationale behind our long-term growth rate

25.57 3.91% 5.29% 5.29% 9.2% - 3.91% = 5.29%

"Implied Earnings Yield" R-g

According to this approach, our long-term growth rate of 3% for the TV calculation, can be argued to be conservative We are aware that net income growth does not translate 1:1 to FCF, this is simply a proxy and we took the conservative end of it

Moritex Acquisition (August 2023)

Moritex has established a reputation as an industry leader providing high-quality with a 50-year history

Product Overview

High-quality, standard optical components with high-accuracy

Headquarters in Yokohama, Japan

Company Information

Moritex is expected to contribute 6-8% of Cognex's revenue

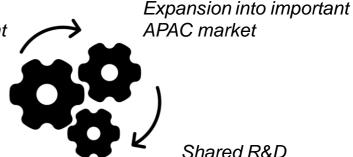

Largest Cognex acquisition, with a price tag of \$ 275 million

Moritex employs approximately 500 people

Expected Synergy Effects

Increased high-end optical components segment

Shared R&D

Consolidation of back-office
