## **Investment Thesis**

## Teradyne triumphs in the ATE Market while innovating robotics for industrial use

#### Pick-and-Shovel Play

Teradyne is an investment covering one of the first steps in the semiconductor value chain without being exposed to specific market risks

#### **Diversified Portfolio**

Successful expansion into new ventures such as robotics mitigate competitive risks under the automated test equipment (ATE) duopoly

#### **Robotics**

Through strategic investments and strong R&D, Teradyne managed to become market leader in the mobile industrial robots' market in just a few years

#### Customers

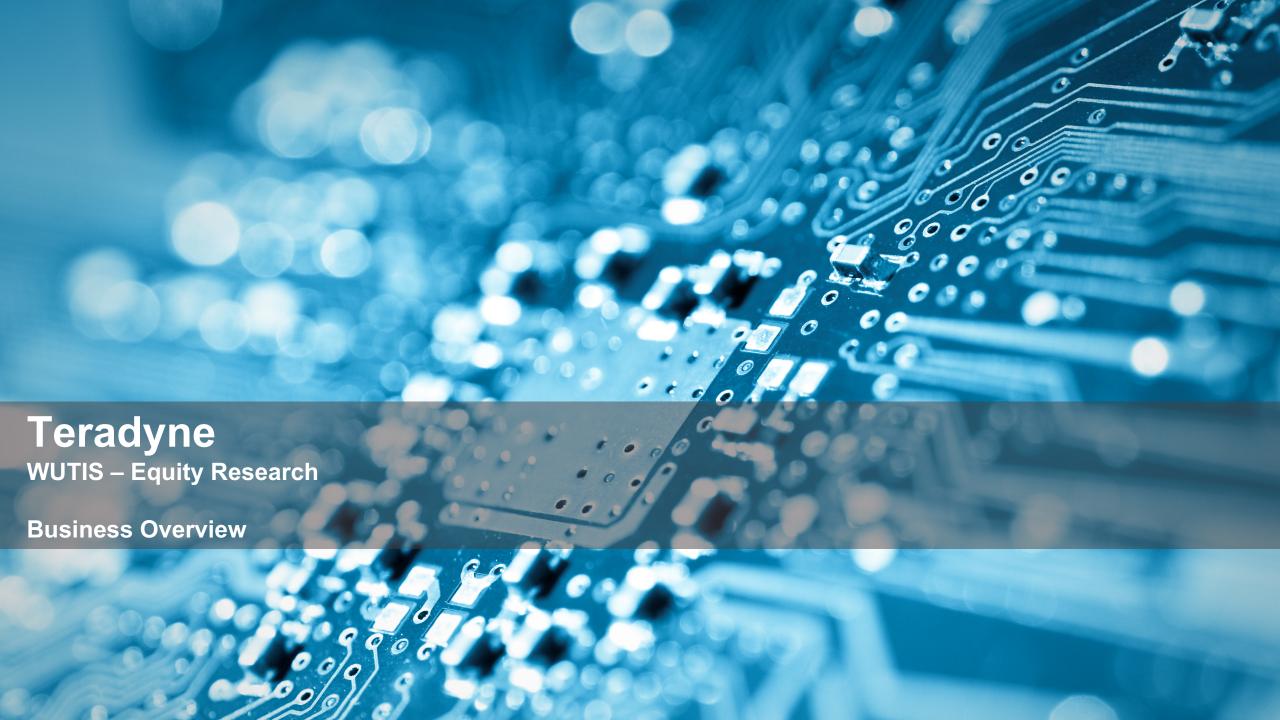

Teradyne counts some of the biggest semiconductor and technology players to their customer base which has historically been extremely loyal due to high switching costs

## **Cyclical Semiconductor Industry**

Revenue and short-term growth are vulnerable to industry downturns impacted by macroeconomic conditions and technological advancements

#### **Geopolitical Risk**

Ongoing tensions and the fight over intellectual property between the US and China could harm the demand for Teradyne's products in Asia

## Long established player in the industry, backed by well-experienced management

## **Business Description**

Global leader in automated test equipment and industrial automation solutions, providing services and products for semiconductor testing and robotics

Headquartered in Massachusetts, USA, Teradyne is now employing over 6,500 people all over the world

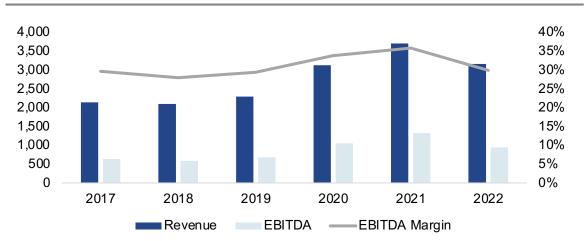

Operations across North America, Europe, the Middle East, Africa and Asia

Founded in 1960, Teradyne is backed by more than 60 years of experience

#### **Financials**

## **Management Team**

**Greg Smith** CEO since Feb 2023. with over 17 years at Teradyne

Sanjay Mehta CFO since 2019, History in the semiconductor industry (Qualcomm)

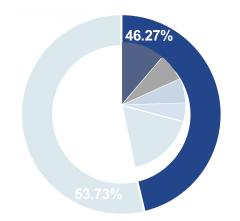

**Rick Burns** President (Test Div.), over 16 years at Teradyne

**Brad Robbins** President LitePoint over 10 years at Teradyne

#### **Shareholder Structure**

- Institutions
- Public and Other
- Vanguard Group Inc.
- Fidelity
- Blackrock
- JP Morgan Asset Management
- Others

# **Geographies**

Asia has been a key hub for automated test equipment manufacturers

## **Key Sites**

## Headquarter in Massachusetts, US

Besides the HQ, Teradyne also operates R&D centers in California, Illinois and Oregon that provide support to US customers

# European P

## **European Partnerships**

Besides providing semiconductor testing equipment in Germany, Teradyne has forged partnerships in France, UK and Italy

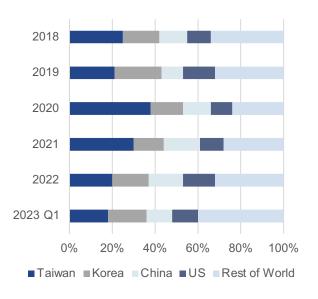

## **Asia-Pacific Semiconductor Hub**

Due to the production of semiconductors, Teradyne's biggest facility is situated in Taipei

## **Market Expansion to India**

Chip migration to India is increasing as the country becomes a preferred destination for semiconductor manufacturing, leveraging its skilled workforce and growing market potential

## Revenue by Geographie

## **Key Ideas**

China, Taiwan, South Korea and Japan make up for more than half of the company's revenue

Declining dependence on Taiwan, which reduces geopolitical risk in case of further tensions

#### **Market Outlook**

North America fastest growing market in 2023 Q1 for semiconductor equipment

## **Business Model**

S

# Unpacking Teradyne's business model consisting of test solutions, automation and industrial applications

## **Business Segments**

#### **Semiconductor Testing**

Digital/Mixed Signals

Wireless

Automotive and Power

Memory

System Level Test

Tull

Teradyne provides test solutions to researchers and manufacturers of a wide range of integrated circuits (IC). Teradyne-tested ICs are utilized in **computers**, **communications**, **automotive**, **identification**, **and internet applications**.

∞ర

Robotics

Ro po

**Robotics** – enabling customers to increase **operational efficiency** by **combining** the power of **automation and human skill** 

Wireless Testing – provides high throughput and enables the rapid and cost-effective transition of breakthrough technologies from the lab to high-volume manufacturing

Storage Testing – focuses on improving overall equipment efficiency, time to market and cost of ownership for hard disk drive (HDD) manufacturers

**Production Board Testing** – provides **reliable high-quality PCB testing** at the greatest fault coverage rate possible without losing throughput

**Defence & Aerospace** – delivers **cutting-edge capabilities**, **exceptional reliability**, and world-class services to military facilities and the defence industry

#### Value Chain

Engineers and partners are researching and developing products to meet future market demands

Teradyne uses its manufacturing expertise to teach the contract manufacturers about making its products

Production

#### **Customers**

Teradyne's customers include some of the biggest chip makers and electronic assembly companies in the world

# **Strategy**

Teradyne extends its product portfolio and market reach through strategic acquisitions and research capabilities

Teradyne and Advantest test

the majority of

semiconductors

worldwide

Teradyne's universal robots

bring safe, flexible and easy-

to-use automatization

solutions to businesses of

every size

## **Value Chain Coverage**

LitePoint Lab products aid in prototyping and verifying ensuring its feasibility before embarking on production

Teradyne products perform the tests of semiconductors to ensure quality and function

Eagle Test Stations verify the correctness of the circuits assembling

The company's universal robots ensure precision assembly and consistency

LitePoint tests the finished product in its final form to ensure the fulfilment of the predetermined functions

The company's MIR and AutoGuide Mobile move the final product and expedite delivery to customer

Teradyne facilitates the entire product development process from idea, production and testing to the delivery.

## **Industrial Automation Group – Acquisitions**

The acquisitions contributed to Teradyne's expansion into the markets of cobots and simulation of complex robotic systems

A merger aimed to **solidify** the portfolio of industrial AMRs with varying payloads to meet growing customer demand

Teradyne through its active acquisition strategy has obtained the leading position as cobots provider with around 45% market share, as well as the second-largest player in AMRs with 8% market share

## **Further Development of the Existing Segments**

lopment Acquisitie , ugno

Semiconductor Division: Provide sophisticated electronics testing equipment used in the consumer electronics, automotive, computing, telecommunications, aerospace, and defense

Wireless Testing: The rising interconnectivity necessitates the efficiency of wireless testing technology with LitePoint facilitating its reach in the automotive industry and beyond

As part of its strategy Teradyne has not only focused on developing innovative products but also on enriching and differentiating its product and segment portfolio through the active acquisition strategy

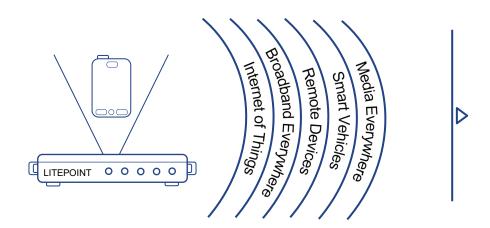

# **LitePoint – Wireless Testing**

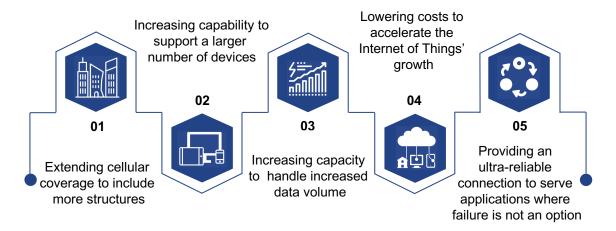

## Accelerating wireless connectivity testing with cutting-edge solutions

## **Wireless Testing**

## The Benefits of Litepoint

## **Next-Gen Connectivity Technologies**

UWB	First fully-integrated test solution to calibrate and validate device with UWB technology
5G	First fully-integrated exclusively over-the-air box test for 5G mm Wave
WiFi	Largest installed base of production WiFi tester
V2X	Facilitation of the <b>revolutionization of the automotive</b> industry – autonomous driving

## **Partnerships**

Partnership with Qualcomm Technologies to develop 5G test solutions accelerating small cell deployment, which offers less power consumption and superior performance enabling greater coverage and throughput in dense urban areas.

LitePoint 's test platform was chosen to validate Broadcom Wi-Fi 7 ecosystem solutions, which is crucial for next-generation applications, i.e. augmented and virtual reality

LitePoint joined the Car Connectivity Consortium (CCC) to ensure a consistent end-user experience for keyless entry in automobiles and trucks.

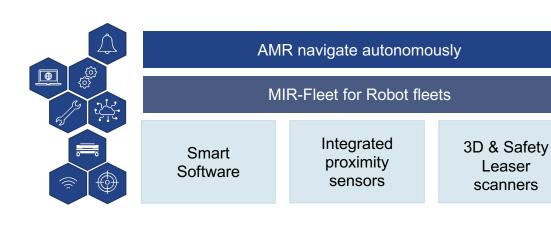

## **Mobile Industrial Robots**

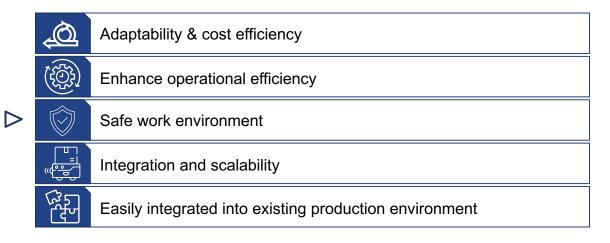

A leading supplier of autonomous mobile robots through strategic acquisitions

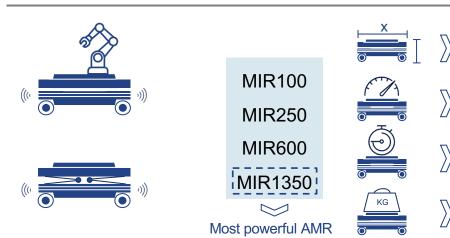

#### The Future will be Smart & Intuitive

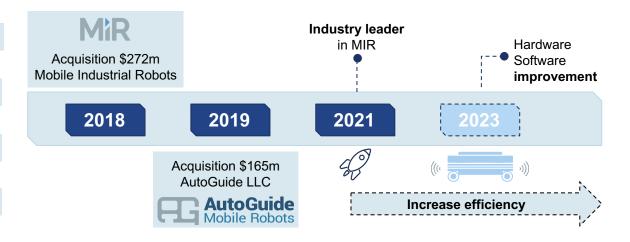

## **Advantages of Mobile Industrial Robots**

## **Product Overview**

## **Success Timeline**

~ 1m x ~ 0,9m

1,2 - 2,0 m/s

9,5 - 10,5h

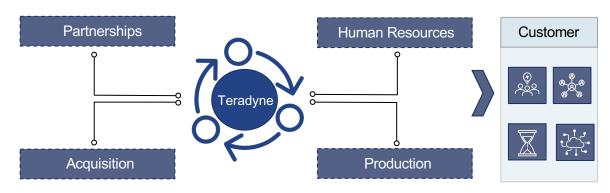

100 - 1350kg

## **Customers**

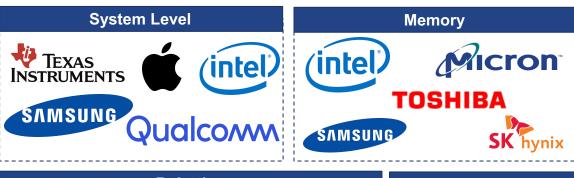

Strategic partnerships enable a fast innovation track record for the existing customer base

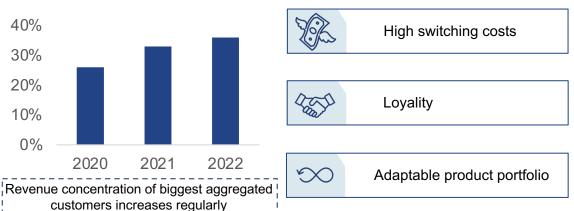

## **Partnership Development**

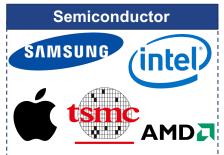

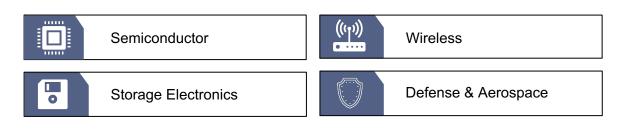

# **Industry & Market Overview I**

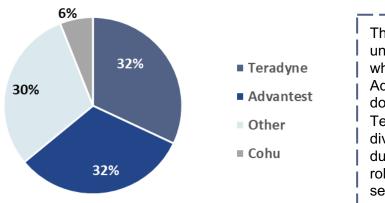

The ATE market is very diverse and connected to many different industries

## **Automated Test Equipment Market (ATE)**

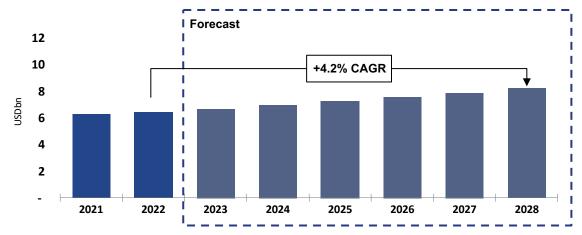

The market for test products is concentrated with a **number of significant customers** accounting for a **substantial** portion of the purchase of test equipment. Teradyne expects sales with their customers to **rise** in the foreseeable future.

## **Market Share by Companies of the ATE market**

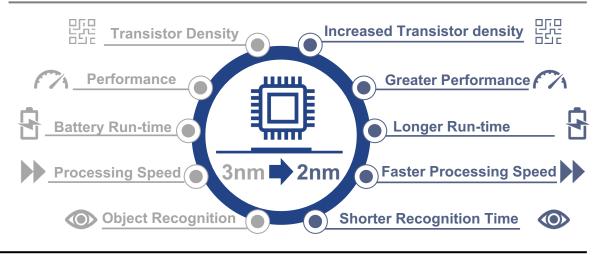

The ATE market operates under a duopoly structure, wherein Teradyne and Advantest, emerged as the dominant players with Teradyne following a more diversified business model due to its promising robotics segment

## **Global Automated Test Equipment (ATE) Market Outlook**

## The Switch from 3nm to 2nm is Transforming the Industry

## **Industry & Market Overview II**

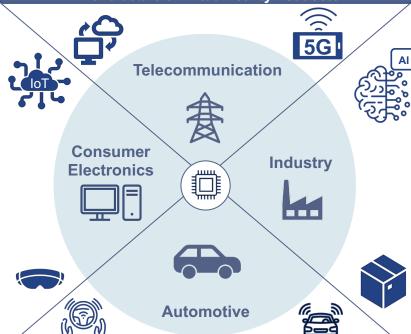

S

Teradyne is profiting from mega trends in the industry while hedging themselves against the cyclicality in the market

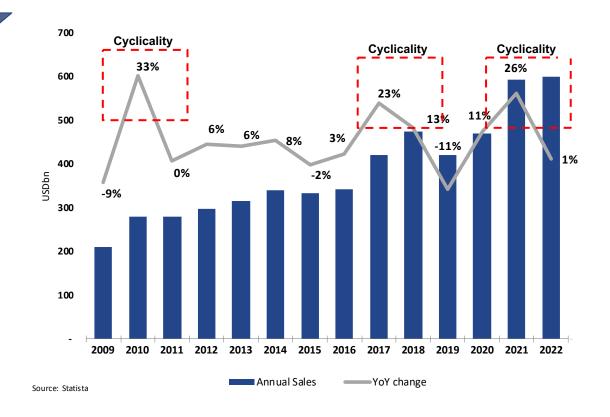

## Overview of Teradyne's Semiconductor Markets and Main Trends

Semiconductors enable efficient transmission, processing and reception of information, highly relevant for **cloud computing**, **5G** and the **internet of things**. They are also an important commodity in the manufacture of **virtual reality headsets**.

Semiconductors are needed for high-performance processors which are essential to **generative Al** and are built in sensors which enable **smart packaging**. Semiconductors are also vital for Technologies such as **autonomous driving** and **electric vehicles** 

## **Cyclicality of the Semiconductor Market**

Teradyne hedges itself against market cyclicality by **diversifying** their product portfolio, serving a **broad range of other industries**, being **active globally** and having a technological advantage over their peers

## **Robotics**

The robotics market has made a lot of change and in the future

Threats Opportunities Control of the Control of the

While robotics can lead to long-term cost savings, the **initial investment** can be high

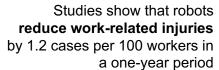

Major progress in production capabilities

21st Century

Robots re-engineer warehouses and manufacturing

Robots can work tirelessly and consistently, leading to increased **productivity** 

The robotics market may face regulatory challenges as governments grapple with defining standards, safety guidelines, and legal frameworks

20th Century

The first industrial robotics arm went to work in an automotive plant

Robotics provides opportunities for automation across various industries. It can streamline processes, increase efficiency, and reduce costs

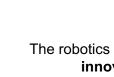

Questions surrounding **privacy**, **security**, **liability**, and the impact on human interaction need to be addressed

Robotics often involves complex

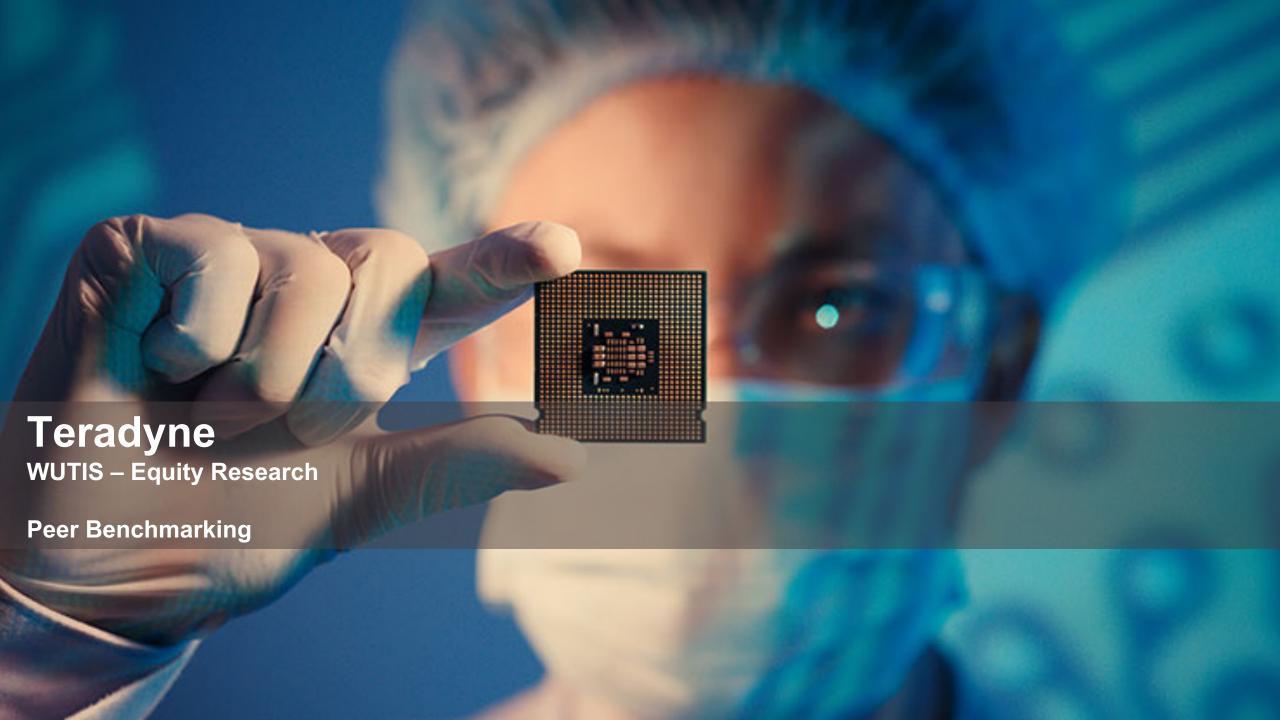

systems and integration with

existing infrastructure

The robotics market fosters innovation, driving advancements in various technologies

# **Peer Benchmarking**

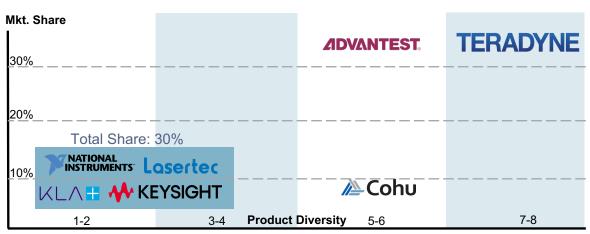

W U T I S

A clear duopoly with Advantest, however, slight advantage for Teradyne

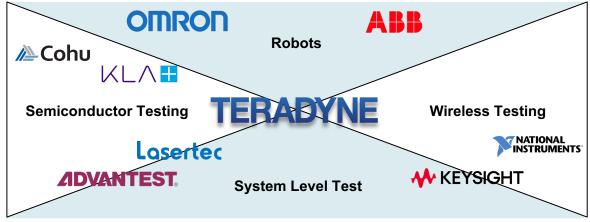

## **Tier Ranking of Competitors**

## **ATE Market Share / Diversity Matrix**

## **Industry Comparison**

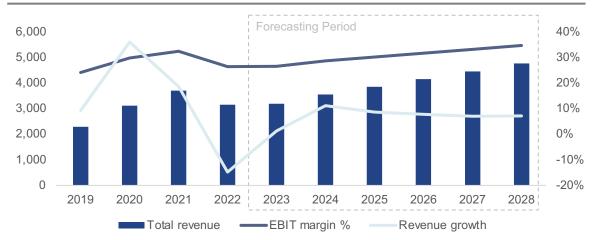

## Valuation I

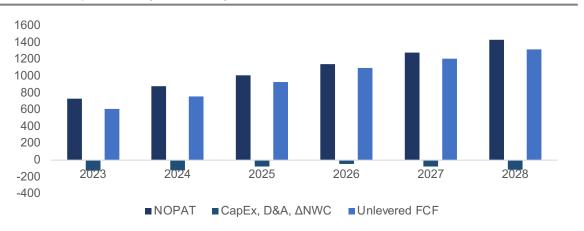

Segment diversification into high-growth industries and operating efficiencies offset downturns in 2022 & 2023

## Revenue & Margin Development (in USD m)

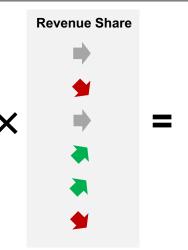

## FCF Composition (in USD m)

#### **Revenue Forecast Rationale**

Market Growth	CAGR
System-on-a-Chip	6.42%
Memory	-0.46%
System	5.64%
Universal Robots	11.72%
MiR	17.63%
Wireless	4.48%

## **Total Revenue**

- Continuous revenue growth after setback in 2022
- Impactful developments in the semiconductor industry
- Diversification into the robotics industry

## **Assumptions**

**Costs**: We expect COGS and SG&A to decrease over the long-run with R&D and CapEx rising due to technological trends and developments in the chip industry as well as efforts in new robotics operations

**Cash conversion cycle**: Based on semidonductor cyclicality and current global macroeconomic developments, inventory on hand is expected to remain high and start to slightly decrease in 2024

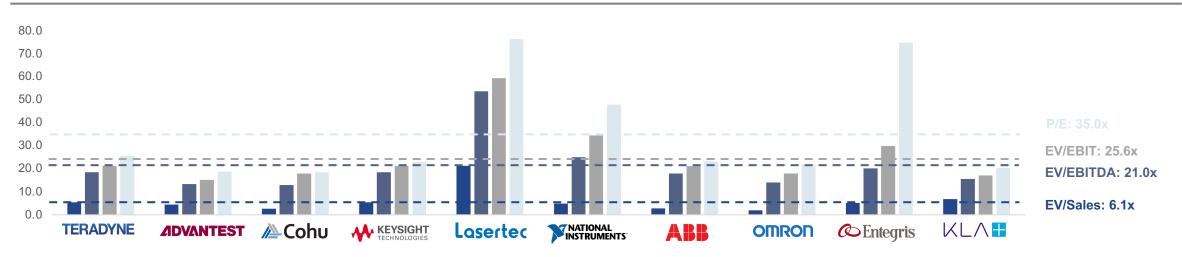

**WACC**: Seperate WACCs for the planning period and the terminal value were used, to account for debt repayments and share buybacks, complemented by a 2% long-term growth rate

## Valuation II

Different valuation approaches imply optimistic share price outlook

## **Multiples Valuation**

## **Valuation Summary**

DCF Model

**Bull Case:** Chip testing demand rises after accelerating transition to 2nm semiconductor production and robotics segments succeed faster than expected, thereby gaining share in total revenues

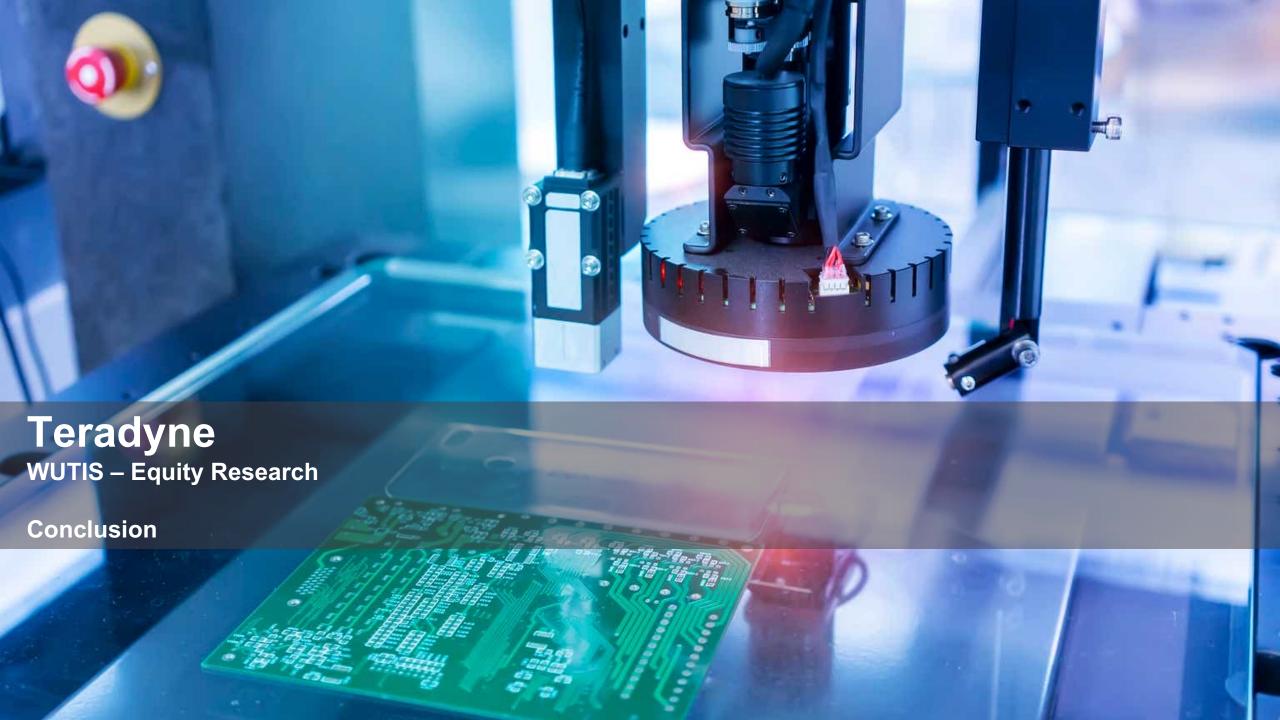

**Base Case:** Diversification into the high-growth robotics industry provide steady revenue growth, while efficiencies in the CCC and gradually declining cost margins increase cash generation

**Bear Case:** Slowing transition to 2nm semiconductor production leads to decline in demand and robotics segments struggle to gain foothold, letting share in total revenue stagnate.

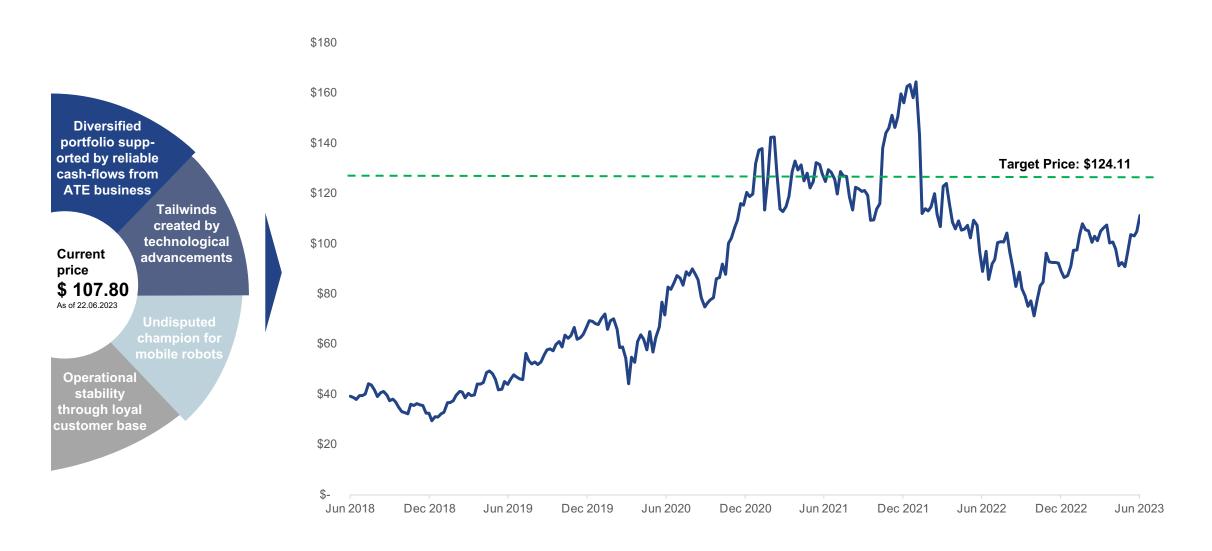

## **Conclusion**

Promising market evolution and diversification strategy provide for a significant upside potential

# **Appendix: System Level Test (SLT)**

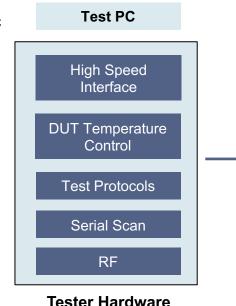

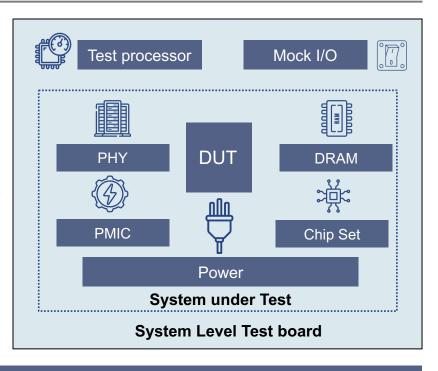

With maximum precision to cutting edge testing outcomes

## **System Level Test**

DUT: Device under Test RF: Radio Frequency PMIC: Power Management IC PHY: Physical Layer

Test Program

## The process

To perform a SLT in production environment requieres to build a system

This system is then implemented on a test board, which looks very similar to the final production board in which the tested device will later be implemented

**S** 

The test itself is run as a **software code**. The SLT testers are able to accomodated **multiple** testing **approaches** 

## **Advantages**

More **precise** testing through reallife function tests

Possibility for **full** and **partial** SLTs, making tests more flexible

SLT provides a **wider range** of complicated scenarios which are hard to find manually

Helps to **identify** marginal **errors** in **design** 

- More accurate presentation of problems leads to better quality
- SLTs help to **optimise** the cost-of-test/quality ratio
- Recreate the end-use environment as closely as possible
- Tests the way hardware and software interact together

# **Appendix: The New Era of Robotics**

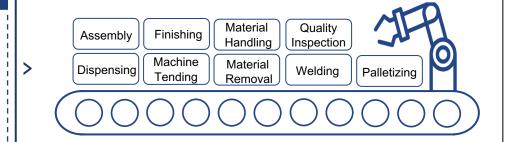

Teradyne has a market leading portfolio of robotics solutions

#### **Collaborative Robots or Cobots**

Cobots operate alongside humans. They are lightweight, simple-to-programme robotic arms with flexible architecture that may be educated to execute an infinite number of applications.

Easy Programming & Setup

Flexible Automation

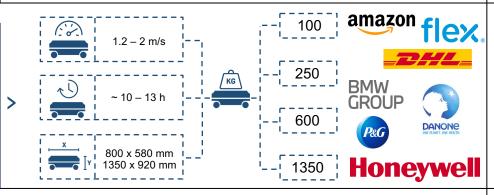

Collaborative and Safe

#### **Autonomous Mobile Roborts**

AMRS enable users to handle internal logistics swiftly and cost-effectively, without the need for infrastructure improvements, they provide simple deployment, greater safety, and increased inhouse logistics efficiency.

Integration & Scalability

Cost-effective & Agile

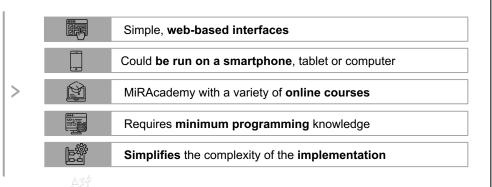

Intelligent Navigation

#### **Motion Control Software for Robots**

The program is used to **control** and **simulate robotic motions** in **real-time** across a wide range of industries and applications **regardless of hardware or operating system**.

Intuitive & User-friendly

**Easily Configurable** 

Out-of-box Solutions

# **Appendix: Risks**

## The cyclical nature of the market and the complexity of the industry puts Teradyne on their toes

- ATE technology is rapidly evolving, and there is always a risk of existing **M2** equipment becoming outdated as new technologies emerge
- As the market becomes **saturated**, Teradyne may struggle to **M3** differentiate themselves and maintain market share
- ATE companies must maintain stringent quality control measures to 01 ensure accurate and reliable testing. Failure to effectively monitor and control the quality of testing processes can lead to negative results
- ATE companies may face risks associated with a lack of skilled 02 personnel, difficulty in attracting and retaining talent leading to operational inefficiencies and compromised testing capabilities
- Since Taiwan is a very important market of Teradyne, the conflict **O**3 between Taiwan and China can have a huge negative impact
- ATE systems used in certain industries, such as aerospace, L1 automotive, or healthcare, often need to meet strict regulatory and compliance requirements

# **Appendix: Catalysts**

A variety of events may impact Teradyne's share price

Catalyst	Туре	Influenced Factor	Estimated Impact on Share Price
Product Innovation	Soft	Revenue Pipeline	<ul> <li>Medium – Product innovation drives revenue growth and market share expansion for Teradyne that invests heavily in R&amp;D</li> </ul>
Acquisition – Robotics	Hard	Revenue, Margins	<ul> <li>Teradyne's acquisition track record in the robotics segment is sure to continue in 2023 as the CEO announced in Q1</li> </ul>
Technological Advancements	Soft	Revenue	<ul> <li>Strong – Technological advancements especially in the semiconductor industry (3nm to 2nm) can boost Teradyne's product demand</li> </ul>
Competitor	Soft	Revenue Reputation	<ul> <li>If important hardware for Al advancements is mainly provided by companies that are Advantest's customers, this could negatively impact Teradyne's reputation with investors</li> </ul>
Global Semiconductor Shortage	Soft	Revenue Projects	<ul> <li>Strong – A potential Taiwan would harm Teradyne by disrupting the semiconductor supply chain, leading to production delays and potentially reducing customer demand</li> </ul>

# **Appendix: PESTLE Analysis**

W

T

. .

Teradyne is subjected to several risks and opportunities generated by the macro environmental factors

			Impact

## **Appendix: Porter's Five Forces**

The semiconductor testing industry is characterized by a high rivalry among competitors

#### Threat of new entrants

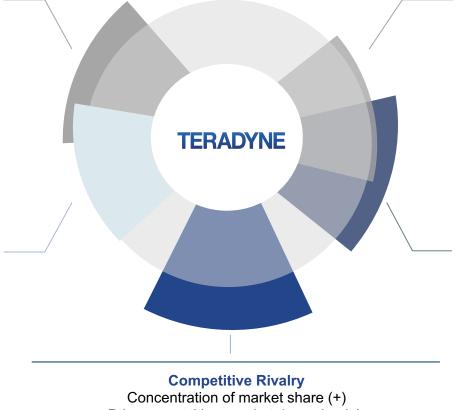

- Large investments costs due to high R&D (-)
  - High technological expertise (-)
  - Highly capital-intensive industry (-)
    - High level of regulation (-)
      - High specialization (-)
        - Duopoly (-)

LOW THREAT

#### Threat of substitution

Development of in-house testing capabilities by semiconductor manufacturers reduces reliance on external providers (+)
Adoption of advanced simulation and virtual testing technologies (+)
Rapid technological advancements and alternatives of competitors (+)

**MODERATE THREAT** 

Concentration of market share (+)
Price competition, market dynamics (+)
Established long-term customer relationships (-)
MODERATE DEGREE OF COMPETITION

## **Bargaining Power of Buyers**

Concentration of buyers lead to greater bargaining power as dependency increases (+) Lock-in due to long-term service contracts and switching costs (-)

Availability of substitute products pressures Teradyne to offer competitive pricing (+)

**HIGH POWER** 

## **Bargaining Power of Suppliers**

Diverse supplier relationships mitigate the risk of limited bargaining power (-)
Sharing intellectual property in a R&D intensive industry would increase the likelihood of accepting higher prices(+)

**MODERATE POWER** 

# **Appendix: SWOT Analysis**

Strengths predominate weaknesses, enabling growth

## **STRENGTHS**

- Technological expertise: Teradyne's technological expertise enables innovative solutions, staying ahead of advancements, delivering high-quality products, and maintaining a competitive edge
- · Established market presence: A long history and strong reputation in the semiconductor testing and automation industry, has built Teradyne a solid customer base and brand recognition
- Diverse product portfolio: Despite its focus on testing, Teradyne has recently invested into other segments such as robotics and automation

## **OPPORTUNITIES**

- · Industry growth and technological advancements: The rise of new technologies such as AI, 5G and IoT generates growing demand for advanced testing and automation solutions
- Increasing demand for automotive electronics: The adoption of electric vehicles, advanced driver assistance systems, and connected car technologies creates the need for reliable and efficient testing solutions
- Expansion into emerging markets: Due to rapid economic growth and industrial development in these markets, the demand for semiconductor testing and automation solutions is increasing

## **TERADYNE**

- Dependence on the semiconductor industry: Since Teradyne's business is tied to the semiconductor industry to a large extent, the company is exposed to fluctuations and downturns in the industry
- Reliance on key customers: The concentration of a significant portion of its revenue from a few key customers exposes Teradyne to risks associated with customer preferences, market competition, and losing key customers
- High R&D and capital expenditure requirements: The high costs and the constant strive for innovation can harm profitability as the company needs to stay ahead of competitors
- Intense market competition: Due to numerous players trying to increase their market share, Teradyne must differentiate itself through its technological expertise, superior product quality, customer relationships, and strong brand reputation
- Rapid technological advancements: Failure to stay at the forefront of technological advancements or developments in the wrong pose threat that Teradyne's testing become outdated
- Global supply chain challenges: Teradyne's complex global supply chain network is exposed to various factors such as geopolitical tensions, changes in trade policies and natural disasters

**THREATS** 

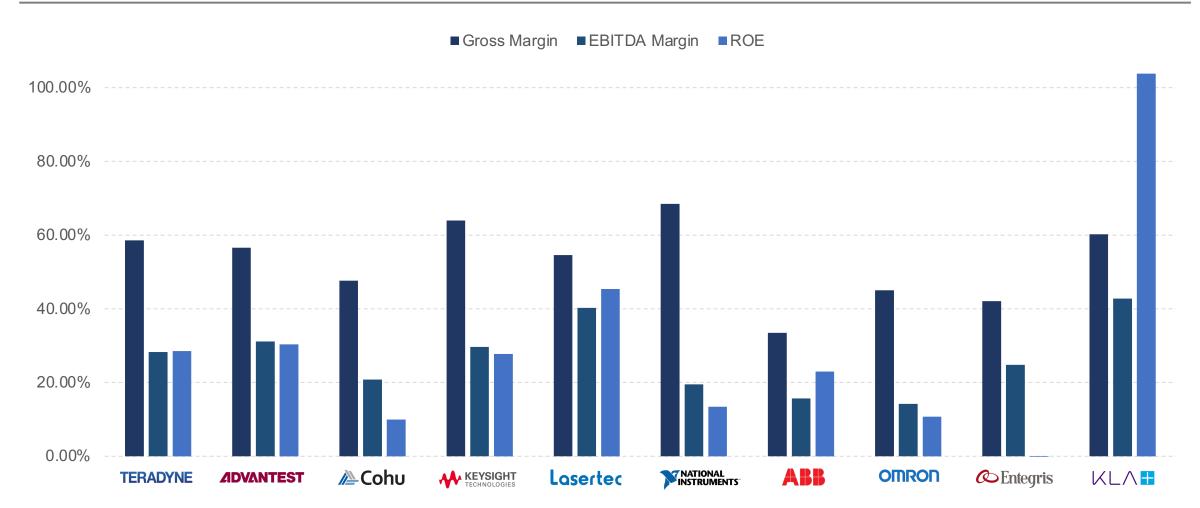

## **WEAKNESSES**

# **Appendix: Peer Benchmarking I**

Relevant financial metrics support investment in Teradyne

## **Comparison with Peer Group**

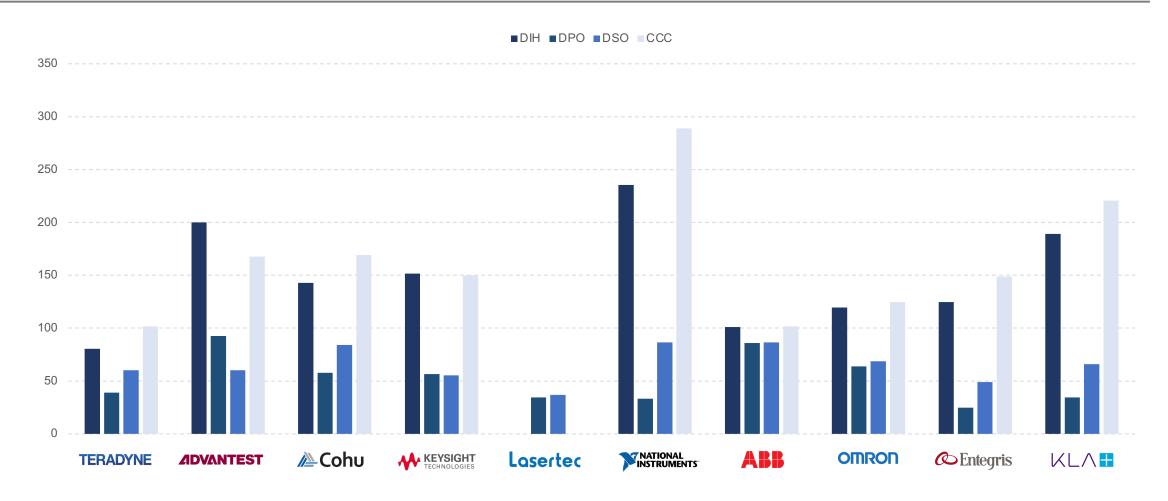

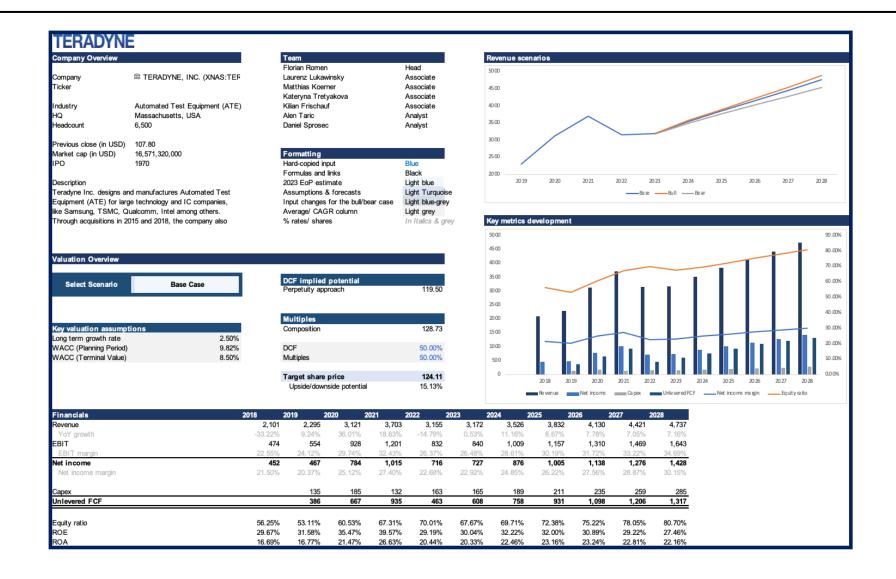

# **Appendix: Peer Benchmarking II**

Relevant financial metrics support investment in Teradyne

## **Comparison with Peer Group**

# **Appendix: Income Statement**

## **Disclaimer**

This document is being made available by WUTIS Trading and Investment Society, acting through its society ("WUTIS"), for information purposes only and for the sole and exclusive use of the addressee in connection with the matter or possible transaction to which this document relates. This document is incomplete without reference to, and should be assessed solely in conjunction with, the oral briefing provided by WUTIS.

This document is strictly confidential and remains the property of WUTIS. You agree that you shall only use this document for the purpose of evaluating and considering the matter or possible transaction to which this document relates. This document may not be distributed, published, reproduced, or disclosed, in whole or in part, to any other person, nor relied upon by you or any other person, nor used for any other purpose at any time, in each case without the prior written consent of WUTIS.

This document does not constitute nor does it form part of an offer to sell or purchase, or the solicitation of an offer to sell or purchase, any securities or any of the businesses or assets described herein or an offer or recommendation to enter into any transaction described herein nor does this document constitute an offer or commitment to provide, arrange or underwrite any financing. You are responsible for making your own independent investigation and appraisal of the risks, benefits, appropriateness and suitability of any transaction or matter contemplated by this document and WUTIS is not making any recommendation (personal or otherwise) or giving any investment advice and will have no liability with respect thereto. The decision to proceed with any transaction or action contemplated by this document must be made by you in the light of your own commercial assessments and WUTIS will not be responsible for such assessments.

Neither WUTIS nor any of its subsidiaries or affiliates, nor any of their respective officers, directors, employees or agents (WUTIS together with such persons being the "WUTIS Group") accepts any liability whatsoever for any direct, indirect or consequential losses (in contract, tort or otherwise) arising from the use of this document or its contents or any reliance on the information contained herein. WUTIS Group is not responsible for any specialist advice, including legal, regulatory, accounting, model accounting, tax, actuarial or other advice.

This document was prepared on the basis of information and data, obtained from publicly available sources and, where applicable, from you and/or any other entity that may be involved in any transaction or matter contemplated by this document (and/or any of your or the aforementioned entities' affiliates), in each case prior to or on the date hereof. The information in this document has not been independently verified by WUTIS. WUTIS has relied on any information provided by you or from third party or public sources as complete, true, fair, accurate and not misleading. With respect to any financial or operating forecasts and analyses provided to it, WUTIS has assumed that they are achievable and have been reasonably and properly prepared on bases reflecting the best currently available information, estimates and judgments as to the future financial performance of the entity(ies) to which they relate and that such forecasts or analyses would be realised in the amounts and time periods contemplated thereby. No member of the WUTIS Group, makes any warranty or representation, express or implied, as to the accuracy, completeness or reasonableness of the information (including projections and assumptions) contained in this document whether obtained from or based upon third party or public sources or otherwise.

This document is given as at the date hereof, may not be final, is based on information available to WUTIS as at the date hereof, is subject to any assumptions set out therein and is subject to change without notice. Accordingly, this document may be based on (a) data and information that may no longer be current and (b) estimates that may involve highly subjective assessments. It should be understood that subsequent developments may affect this document and the WUTIS Group does not undertake any obligation to provide any additional information or to update any of the information or the conclusions contained herein or to correct any inaccuracies which may become apparent. Any data or information regarding, or based on, past performance is no indication of future performance.

Members of the WUTIS Group are involved in a wide range of commercial banking, investment banking and other activities out of which conflicting interests or duties may arise. In the ordinary course of its business, the WUTIS Group may provide services to any other entity or person whether or not a member of the same group as you (a "Third Party"), engage in any transaction (whether on its own account, on behalf of any Third Party or otherwise, and including any transaction or matter contemplated by this document), notwithstanding that such services, transactions or actions may be adverse to you or any member of your group, and the WUTIS Group may retain for its own benefit any related remuneration or profit. The WUTIS Group operates in accordance with a conflicts of interest policy which identifies conflicts of interest it faces in the ordinary course of its business, and establishes organisational and procedural measures to manage those conflicts where it is reasonably able to do so. Neither WUTIS nor any other part of the WUTIS Group shall have any duty to disclose to you or utilise for your benefit any non-public information acquired in the course of providing services to any other person, engaging in any transaction (on its own account or otherwise) or otherwise carrying on its business. WUTIS' research analysts and research departments are independent and are subject to certain regulations and internal policies. WUTIS research analysts may hold opinions and make statements or investment recommendations and/or publish research reports with respect to any company referred to herein, the transactions contemplated herein or any person or entity involved therein or related thereto that differ from or are inconsistent with the views or advice communicated by WUTIS.
